The landing page of tempo60. By turning the roller, learners select one of the 100 sets and start the exercise in training or test mode.

tempo60 helps improve your basic arithmetic for numbers up to 100. The aim is to complete each of the 100 exercises correctly within 60 seconds.

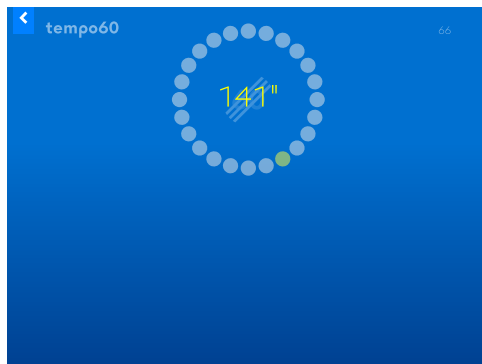

Two modes of working

The training mode allows you to improve your proficiency in the selected training exercise without time pressure. The 24 problems are mixed at random.

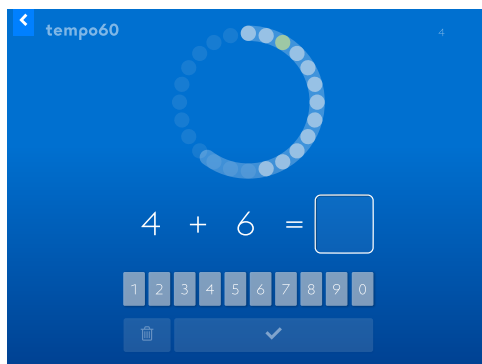

In the test mode, you try to solve all 24 problems in one exercise in 60 seconds. The order of the questions remains the same.

Training mode: Learners develop good skills in the selected sets without time pressure.

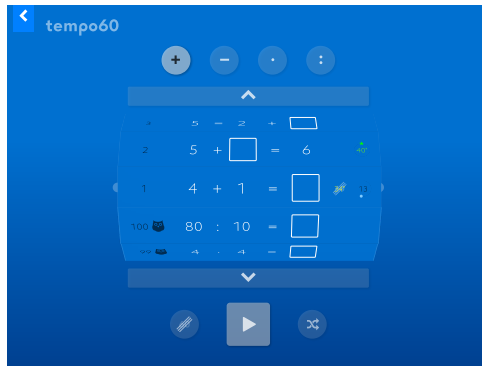

Training mode feedback: The 24 tasks were solved in 141 seconds. One error has been corrected.

Test mode: The clock is ticking. How many tasks can be solved as error-free as possible within 60 seconds?
